

Structure Medical, LLC is a leading manufacturer of medical implant products used by orthopedic surgeons to treat disorders of the musculoskeletal system. Orthopedic surgeons use the devices to treat trauma, sports injuries, degenerative diseases, tumor and congenital conditions of the spine and the extremities.

Founded in 2004 by Len Zaiser, Structure Medical has quickly become a vendor of choice to the top 10% of orthopedic companies globally, specifically in the US and Europe. The company consistently meets the needs of its customers through innovative processes designed to reduce costs without compromising workmanship and quality. While other contract manufacturers shun prototype development work, Structure Medical's capabilities and expertise favorably contribute to the success of its customers in this critical stage of product development. Its unwavering commitment to superior quality enables the customer to rely on Structure Medical in resolving engineering and design issues and effectively executing complicated shapes with extremely tight tolerances.

Located in Naples, Florida, Structure Medical's manufacturing facility houses over 40 state of the art machines which provide the highest level of precision and newest technologies. It has the most sophisticated and advanced equipment including CNC Precision mills and lathes. Structure Medical employs qualified and experienced machinists, programmers, and quality experts to maximize and monitor the use of those technologies and equipment.

The company has experienced tremendous growth in recent years. In 2009, Structure Medical boasted a 115% increase in sales, created 25 new jobs and invested millions in new equipment and a new facility. It is on target to exceed that growth in 2010.

Structure Medical's success is based on its core competencies which are the best people, the best machinery and the best practices. The company is committed to the achievement of excellence and is poised to accomplish it through the use of industry best practices and in providing world class service to its customers.
